EDUCATION

National University of Singapore

May 2020 - May 2024

Bachelor of Computing in Computer Science, Focus in Database Systems and AI — University Scholars' Programme

- Recipient of the NUS Science and Tech Merit Scholarship (Non-Bonding)
- Relevant Coursework: Relational Database Design and Tuning, Software Design Principles, OS, Network Protocols, OOP, AI & Machine Learning, NLP
- Exchange: NUS Overseas College (NOC) Paris at PSL Research University (Jan - Jul 2023)

TECHNICAL SKILLS

Languages: Java, Python, C++, JavaScript / TypeScript

Frontend: React, Redux, Vue, Ionic, HTML, CSS, Bootstrap

Backend & Infra: Node.js, AWS, Docker, Kubernetes, Hadoop, Spark, Firebase

Databases: PostgreSQL, MySQL, MongoDB

EXPERIENCE

Security Trooper (Mandatory National Service), Singapore Armed Forces

May 2025 - May 2027

Associate Developer, SAP

Jul 2024 - May 2025

- Cut deployment time from 2-3 days to 1-2 hours and automated test runtime from 1 hour to 5-10 minutes, by building a deployment and testing automation platform in Python on Azure Pipelines
- Built and scaled a document-processing OCR application handling 10,000 documents monthly, developing scalable backend services in Java and Python
- Raised supported document format coverage from 60% to 90% on the legacy OCR application ahead of its replacement, while resolving bug reports and deprecated dependencies

Backend Developer, Astreva

Feb 2023 - Jul 2023

Paris, France

- Designed backend architecture from scratch using Node.js and PostgreSQL, enabling efficient data management and scalability for 10,000 data objects monthly
- Engineered an LLM-powered sourcing pipeline that surfaced 500 candidates per job request in under an hour, versus roughly a week for manual search
- Crafted CI/CD pipelines using Docker and Kubernetes, reducing deployment time by 50%

Full Stack Software Engineer Intern, Ryde

Dec 2021 - Jul 2022

Singapore

- Built a Vue.js and Firebase powered location-tracking web view, delivering real-time trip status updates to a user base of over 50,000 individuals monthly
- Built a metrics dashboard within a React-based on-demand service web portal, empowering over 10,000 merchants per month to generate business statements

Undergraduate Teaching Assistant, National University of Singapore

Jul 2021 - May 2024

- Guided 80 students in implementing Database Systems using PostgreSQL (Spring 2022 & 2024) and mentored 20 freshmen in functional programming (Fall 2021 & 2023)

PROJECTS

AnyTutor

- Launched a website utilizing AWS to facilitate creation of AI Avatar-enhanced deepfake videos through audio and text file processing

ModRacing

- Built a mini racing game integrated with NUSMods using data structures and Python search algorithms; recognised at NUS Hack&Roll
